Charity Golf Day 2024

Join us at the prestigious Woburn Golf Club for our annual Charity Golf Day.

Woburn Abbey and the surrounding estate will provide a stunning backdrop for the day, with the event taking place on one of Woburn's three championship courses, The Dukes.

Teams of four will tee off after breakfast, where they will enjoy 18 holes on the impressive Dukes course. There will also be a range of fun on-course competitions throughout the day including nearest pin, longest drive and beat the pro.

Afterwards, teams will retire for a well-earned drink, before sitting down to enjoy a three-course dinner and prize giving. There will also be a Live Auction and Raffle in aid of Medical Detection Dogs and a presentation from one of our Client's.

Sign up now to secure your team's place.

Medical Detection Dogs – Dogs Saving lives

Medical Detection Dogs trains dogs to detect the odour of human disease with the aim of developing faster, more efficient and less invasive diagnostics that lead to better patient outcomes.

We are at the forefront of the research into the fight against cancer and other life-threatening diseases, including Parkinson's disease and bacterial infections.

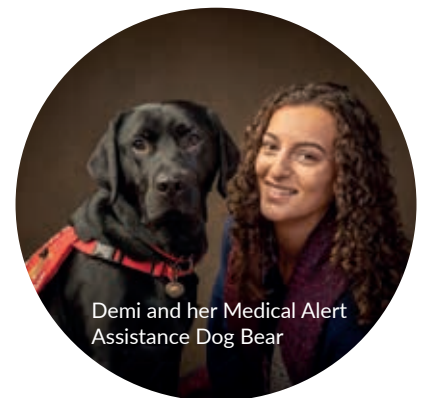

Our Bio Detection Dogs are trained to find the odour of those diseases in samples such as urine, breath and sweat and our work has the potential to benefit millions.

We already apply what we know about the science of canine olfaction to benefit people by training Medical Alert Assistance Dogs to detect minute changes in an individual's personal odour triggered by their disease and alert them to an impending medical event. This helps them manage complex, life-threatening medical conditions such as Postural Orthostatic Tachycardia Syndrome (PoTS), severe allergies, Addison's disease or Type 1 Diabetes and therefore drastically improve their quality of life.

We could not carry out our work training our incredible dogs without the generous support we receive from our supporters. Each time a dog alerts a client and prevents a medical emergency or identifies a positive sample of cancer or Parkinson's disease it is thanks to support from generous people like you, which ensures we can continue to train our life-saving dogs, thank you so much.
